

CSM Design Fee Schedule

Cambridge Sound Management is pleased to offer **System Design Services** to our *Certified Masking Partners*. With this service, we can relieve your resources from the task of time consuming sound masking design and provide you with best-practice system layouts, proper zoning, and complete wiring diagrams as part of your quote. This cost-effective service is included as a line item on all design quotes and is only charged if you place the order.

Upon receiving your request for a quote and design, we will provide the emitter placement superimposed on the supplied drawings (PDF or CAD) along with a bill-of-materials. Wiring diagrams, included in the price, are supplied at the time of the order if requested. Given the accuracy of AutoCAD it is the preferred file if available.

Budgetary quotes include a design fee estimate should a full design be requested later.

Design Fees are based on emitter count and are priced per floor as follows:

Emitter count per floor:

1 – 50:	\$50
51 – 100:	\$75
101 - 200:	\$100
201 - 300:	\$200
301- 400:	\$300
401 and up:	\$400

Revisions

First	Included
Second	Included
Third	Add \$100 per revised floor
Four or more	Add \$150 per revised floor

** In the event that CSM has to convert PDF files to CAD after an initial PDF design has already been completed, the total design fee will double.*

Example: 1 Floor Installation

Floor 1 has 129 emitters: \$100

Total Design Fee = \$100

Example: 3 Floor Installation

Floor 1 has 129 emitters: \$100

Floor 2 has 48 emitters: \$50

Floor 3 has 240 emitters: \$200

Total Initial Design Fee = \$350

Converted from PDF to CAD: \$350

Total After Conversion: \$700
