

Qt emitter™

APPLICATION

Qt emitters are miniature, direct field speakers and are omnidirectional, providing nearly 180 degrees of sound dispersion. These plug-and-play emitters may be used interchangeably with all of Cambridge Sound Management's sound masking, paging and music control modules.

Qt emitters are offered in one format: micro adjustable emitter. These adjustable emitters allow the sound masking input to be reduced by up to 9dB, in 3dB increments to compensate for different acoustic conditions within a zone.

HOW TO SPECIFY

Emitter	Control	Color	Standard cable lengths (ft) May be specified	Quantity
E (Emitter)	A (Adjustable)	W (White)	16 ft (4.9 m)	4
	A (Adjustable)	B* (Black)	30 ft (9.1 m)	

* For black color emitters, CSM ships white emitters with the appropriate color cap. Emitter caps easily attach to the emitter grill for a flawless painted look.

Examples:

E-A-W-16-4: An adjustable white emitter with a 16' cable that comes in a pack of 4.

E-A-B-30-4: An adjustable black emitter with a 30' cable that comes in a pack of 4.

INSTALLATION

Installation is on a simple grid pattern.
(A standard 9' (2.74 m) ceiling uses a 10' X 10' (3 m x 3 m) grid.)

Emitters are plug-and-play, daisy-chained together with CAT-3, plenum-rated cables, pre-terminated with industry standard RJ-45 connectors. The Qt adjustable emitter back plate features three dip switches to enable -3dB, -6dB and -9dB adjustments.

Emitters fit any ceiling tile from 1/2" to 1-1/2" thick. The required hole saw is included with purchase of control module.

For installations in other ceiling types, see mounting options.
