## Qt® Emitters

Small, plug and play individually adjustable emitters, are the backbone of the QtPro sound masking system. Nearly 180 degrees of sound dispersion provides uniform, unobtrusive masking. Can be installed in any ceiling surface including acoustic ceiling tile, beam, drywall, metal, and wood. Emitters are plenum-rated, UL-listed, and comply with UL 2043.

## Qt® Active Emitters

Provides high sound level and a broader frequency range than standard Qt Emitter. A good choice when paging and background music are needed. Similar footprint and cabling infrastructure to standard Qt Emitter.

## Qt® Room Control

Easy to adjust the sound masking levels in patient rooms, private office space, and conference rooms. The mounted control unit features 6 discrete volume level selections including off. Designed to work with any QtPro sound masking system. Can be added to an existing QtPro sound masking installation.
